SUMMARY

Adaptable and results-oriented B.Tech graduate in Artificial Intelligence and Data Science with a multidisciplinary skill set spanning data analysis, business strategy, and full-stack web development. Adept at turning complex problems into actionable insights and practical solutions using analytical thinking, AI tools, and strong domain understanding. Experienced in delivering real-world projects in WordPress development, data-driven decision-making, and cross-functional collaboration. Known for effective communication, team leadership, and a proactive approach to continuous learning and eager to contribute to dynamic environments.

WORK EXPERIENCE

Project Associate- Find Infra Solution, Coimbatore

Jan 2025 - Present

- Developed and maintained company and client websites using WordPress, ensuring responsive design, functionality, and performance.
- Directly communicated with clients to understand their business needs and translated them into customized web solutions. Collaborated with the editorial to ensure accurate and timely content integration across web pages.
- Ensured client satisfaction by delivering on-time updates, improvements, and post-launch support. Played a key role in project coordination and requirement analysis, acting as a bridge between technical and non-technical teams.

WordPress Developer - Simsys software ,Coimbatore

Jun 2025 - March 2025

- Worked on WordPress website development and customization for client-facing platforms, ensuring smooth performance and brand consistency.
- Gained hands-on experience with ERP software setup, including initial configuration, module customization, and workflow implementation. Conducted client training sessions to onboard users and demonstrate ERP system functionalities tailored to their business operations.
- Acted as a liaison between the technical team and clients, helping translate user needs into functional requirements.
- Supported post-deployment activities such as troubleshooting, feedback collection, and iterative improvements to enhance user experience.

PROJECTS

AI-Based Child Habitation Learning Platform

Feb 2025 - Present

Developed an AI-powered moral learning platform for children aged 4–12 that uses situation-based cartoon storytelling to teach positive behavior, empathy, and emotional intelligence. The system dynamically generates child-friendly stories using GPT, delivers interactive choices, and provides real-time voice narration using Google TTS. A secure parent dashboard tracks emotional traits, behavioral progress, and offers real-world challenge suggestions based on the child's decisions.

Smart Human Behaviour Detection using Yolo

Dec 2024 - March 2025

Developed a real-time video analytics system using YOLOv8, Python, OpenCV, and Flask to detect human behaviors such as falls, vehicle crashes, and social distancing violations; achieved over 90% accuracy with automated email alerts and a responsive web interface.

EDUCATION

B.Tech Artificial Intelligence and Data Science

2021 - 2025

Kathir College of Engineering

Bachelor's Degree in Artificial intelligence and data science with average CGPA of 7.2

Subash Matriculation higher secondary school

2020 - 2021
